

Spring Township Water Supply Well

Client: Spring Township Water Authority

Centre County, PA

Year: 2018 Cost: \$1,250,000

Gwin, Dobson & Foreman designed a new water supply well for the Spring Township Municipal Authority near Pleasant Gap, PA. With a yield of 500 gallons per minute, the new groundwater source will provide a high capacity supplemental water supply for the Authority.

Project elements include a submersible well pump with variable frequency drive, treatment system consisting of a gas chlorination system, 8" magnetic flow meter, chlorine booster pumps and chlorine contact piping and electrical work (emergency generator, transfer switch and control system).
