

Transmission Main Reinforcement - PAWC McMurray District

Client: Pennsylvania-American Water Company – McMurray District
Washington and Allegheny Counties, PA

Year: 2022 Cost: \$13,000,000

Gwin, Dobson & Foreman, Inc. provided design services for installation of 20,000 LF of water transmission main for the Pennsylvania-American Water Company.

The project provided enhanced water transmission reinforcement for the McMurray District service area in North Fayette and Findlay Townships, Allegheny County and Robinson Township, Washington County, PA.

The project involved installation of 9,400 LF of 24" ductile iron pipe along US Route 980, 3,600 LF of 24" main in McDonald Borough and 7,000 LF of 12" main to the Findlay Industrial Park on Ridge Road and Solar Drive.

GD&F provided all design phase services including permit applications, underground utility locations, system interconnections and horizontal and vertical route alignment.
