New Disinfection System - PAWC Koppel Wastewater Treatment Plant

Client: Pennsylvania-American Water Company – Koppel Wastewater District Beaver County, PA

Year: 2021 Cost: \$2,000,000

Gwin, Dobson & Foreman designed an ultraviolet disinfection system for the PAWC Koppel wastewater treatment plant. The project included a building retrofit to accommodate a channel UV system, new laboratory, Parshall flume and metering manhole. Services included preparation of plans, permit applications and specifications and construction administration.
